EUPATI 2017 Evaluation Report

The following report summarises in an easy to read format the activities of the EUPATI Programme to date since the end of EUPATI as a project under IMI in January 2017. The measures evaluated are based on the objectives and miles stones defined under IMI-EUPATI and in the subsequent Steering Group discussions and described in the EUPATI Programme Work Plan 2017. Further details are provided in the appendicies distributed with this document and stored in the Evaluation 2017 Folder stored on Box.com. 2017 marked the first of the three year bridging phase of the EUPATI programme, with the aim to stabalise activities created by the IMI project, whilst building the infrastructure needed for 2018 and 2019 to focus on the issue of mid- and long-term sustainability for EUPATI, whilst continuing the delivery of three key pillars that make EUPATI a successful programme: the Patient Expert Training Course, the Toolbox, and the EUPATI National Platforms network. The visual traffic light system used in this report provides an indication of completion of an objective or milestone, or the need for continued work. Details are provided next to each line item in the table.

Highlights
