

# Establishing Your EUPATINational Platform (ENP)

Starter kit

# Why establishing your ENP?

The reason...

- To further develop patient education in medicines R&D in your country.
- To establish a patient-led platform to achieve this objective.

What might this look like?

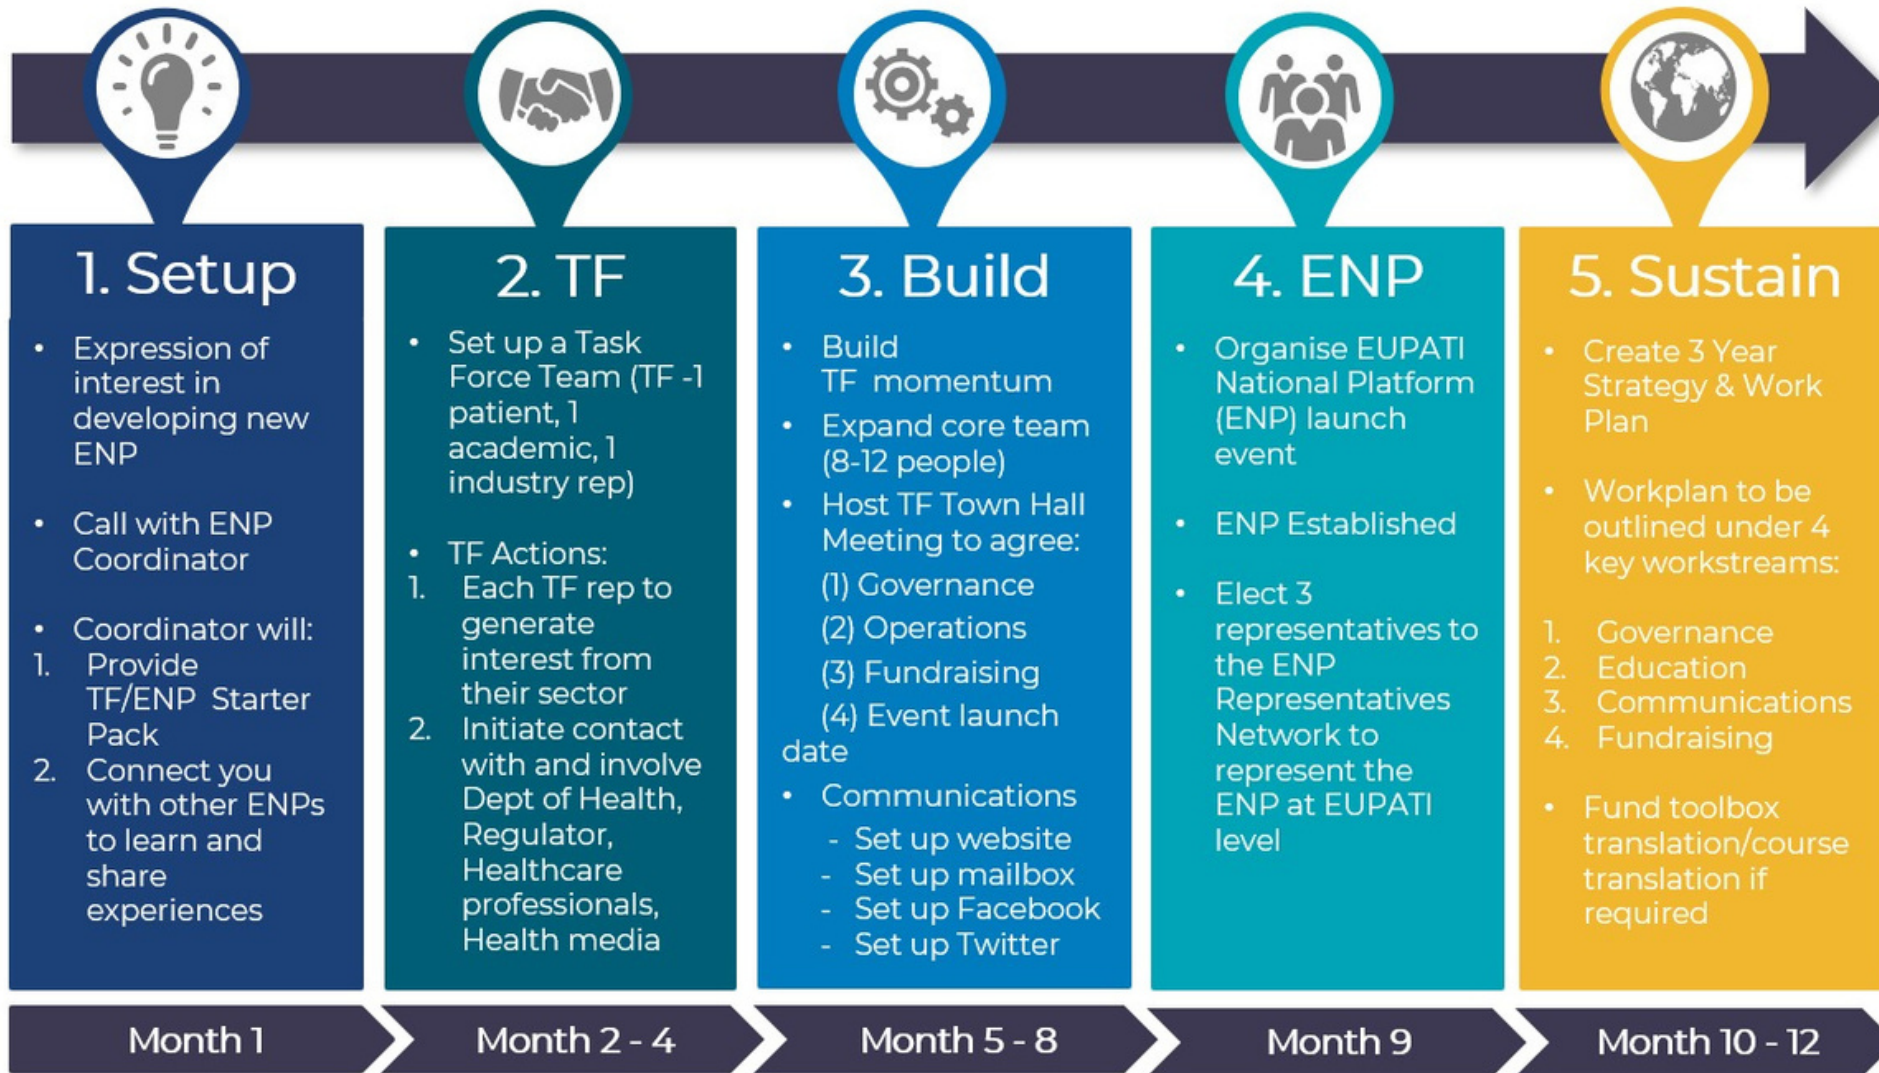

- A non-governmental/voluntary organisation which may require a distinct legal entity.
- This may require the setting up of a temporary liaison team.
- There is no 'one-size-fits-all' approach in this area.

Establishing a legal entity is useful because...

- It may enable you to apply for future funding.
- It ensures continuity, stability and puts patient education on a surer footing.

# How to establish your ENP?

ENP Objectives:

1. Ensure EUPATI understands the educational needs of patients and the lay public on medicines R&D
2. To disseminate EUPATI training and education material
3. To raise public interest in EUPATI at the national level
4. To identify faculty, logistics and financial support for national training and education opportunities

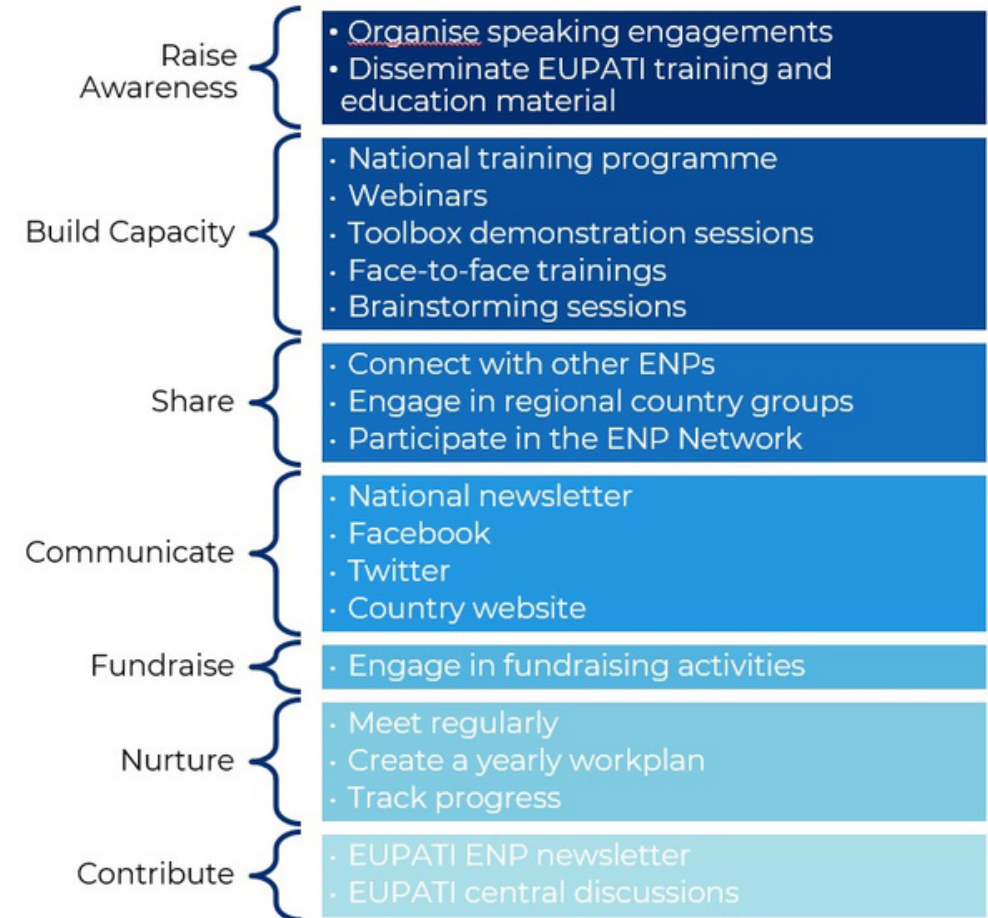

# The end result...

What your ENP could look like :

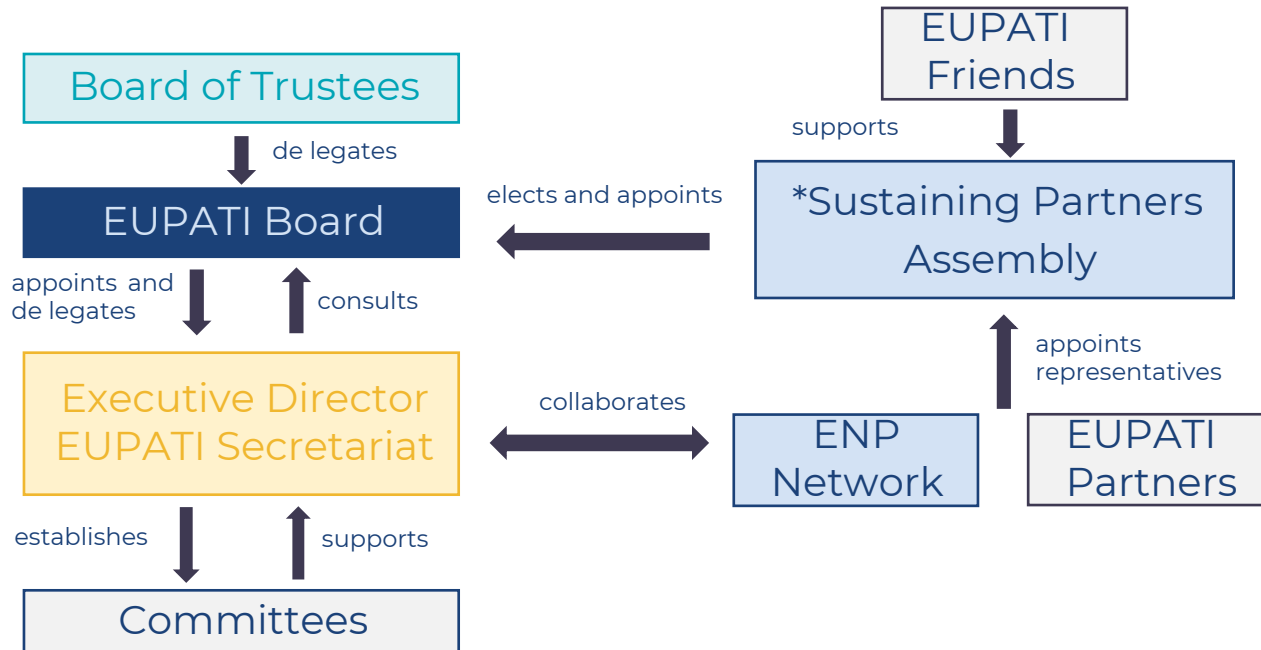

What your ENP should be doing :

# ENP Governance Structure

# Check List

Don't forget! Have you...

- Completed your stakeholder and country map?
- Connected with other ENPs?
- Completed your declaration of interest form?
- Completed your Task Force workplan?
- Do you have a signed ENP statute? Is it kept updated?
- Do you have a signed MoU?
- Returned your ENP Governance overview form to the EUPATI National Coordinator? Have you established all your communication channels?
- A fundraising plan in place?
- Nominated your 3 country representatives and informed the National Coordinator
- An ENP sustainability workplan in place?

Any questions?
